Introduction

This document constitutes a prior art record of the user interface design of the EcoBlend OS Venture Validation System (VBS), a proprietary software platform developed by BEBUS Group Ltd (Company No. 15618885). It is submitted to the UK Copyright Service as a dated record establishing the origination of the described visual works.

The EcoBlend OS VBS comprises 22 functional modules accessible through a unified dashboard interface built with React 19, TypeScript, Tailwind CSS 4, and shadcn/ui. The interface design, layout architecture, colour system, navigation structure, and visual hierarchy are original works of authorship created by BEBUS Group Ltd.

This document contains 22 annotated screenshots of the live platform at ecoblend.io, each accompanied by a detailed description of the module's purpose, components, and design intent. Screenshots were captured at 1440 x 900 pixels from the live production environment in June 2026.

Design System Summary

Primary Colour	#1A2332 — Deep Navy (backgrounds, headings)
Accent Colour	#51AF37 — EcoBlend Green (VRL indicators, CTAs)
Secondary Accent	#3A97D3 — TRL Blue (TRL indicators, charts)
Warning Colour	#F49C13 — Amber (milestones, alerts)
Typography	Prompt (headings), Inter (body) — Google Fonts
Framework	React 19 + Tailwind CSS 4 + shadcn/ui components

1. Portfolio Overview

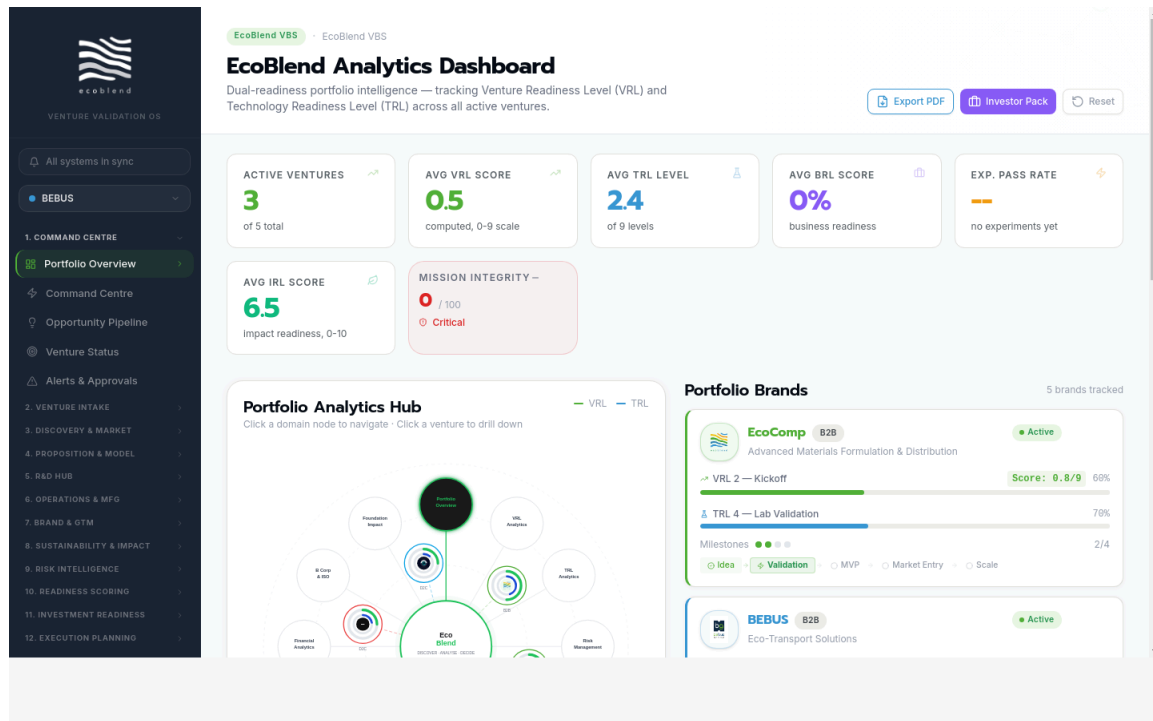

Figure 1: 1. Portfolio Overview — EcoBlend OS VBS, ecoblend.io

Module Description

The main dashboard landing page. Displays the hub-and-spoke Portfolio Analytics Hub diagram showing all ventures and their domain connections, four KPI tiles (Active Ventures, Avg VRL Stage, Avg TRL Level, Milestones Completed/Total), and individual Venture Cards with dual VRL/TRL progress bars and milestone dot indicators. Supports one-click navigation to any venture detail page. Includes Export PDF and Onboard Founder actions.

2. Control Desk

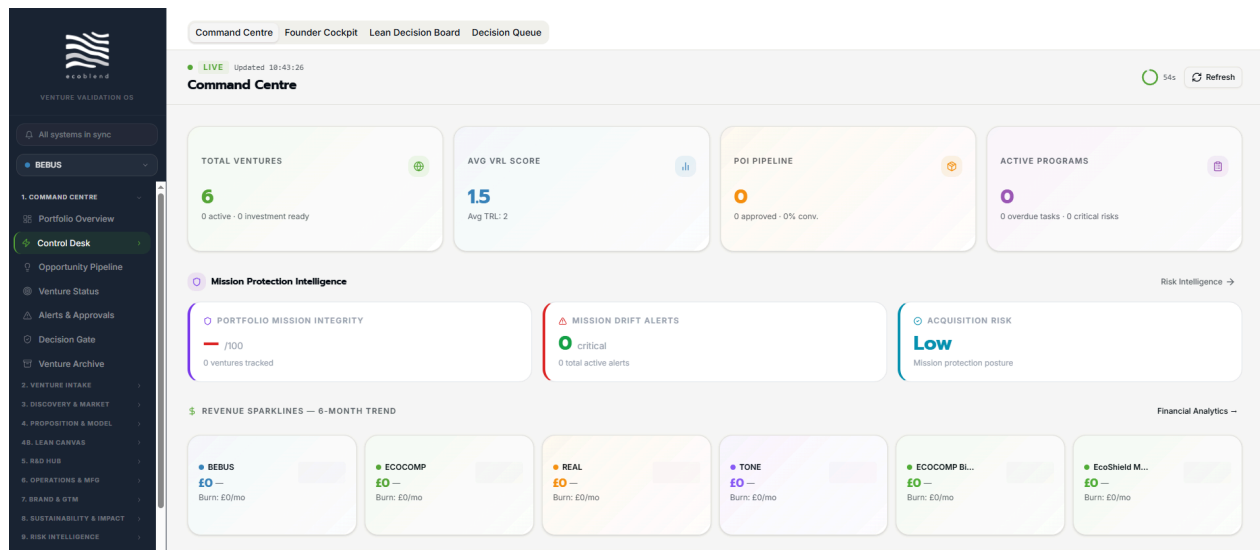

Figure 2: 2. Command Centre — EcoBlend OS VBS, ecoblend.io

Module Description

The real-time portfolio intelligence hub. Displays live metrics across all ventures including VRL/TRL averages, WTP scores, risk band distribution, and experiment velocity. Contains an alert feed for critical signals, a venture health matrix, and a portfolio-wide readiness heatmap. Serves as the primary operational view for the portfolio manager.

3. Venture Intake

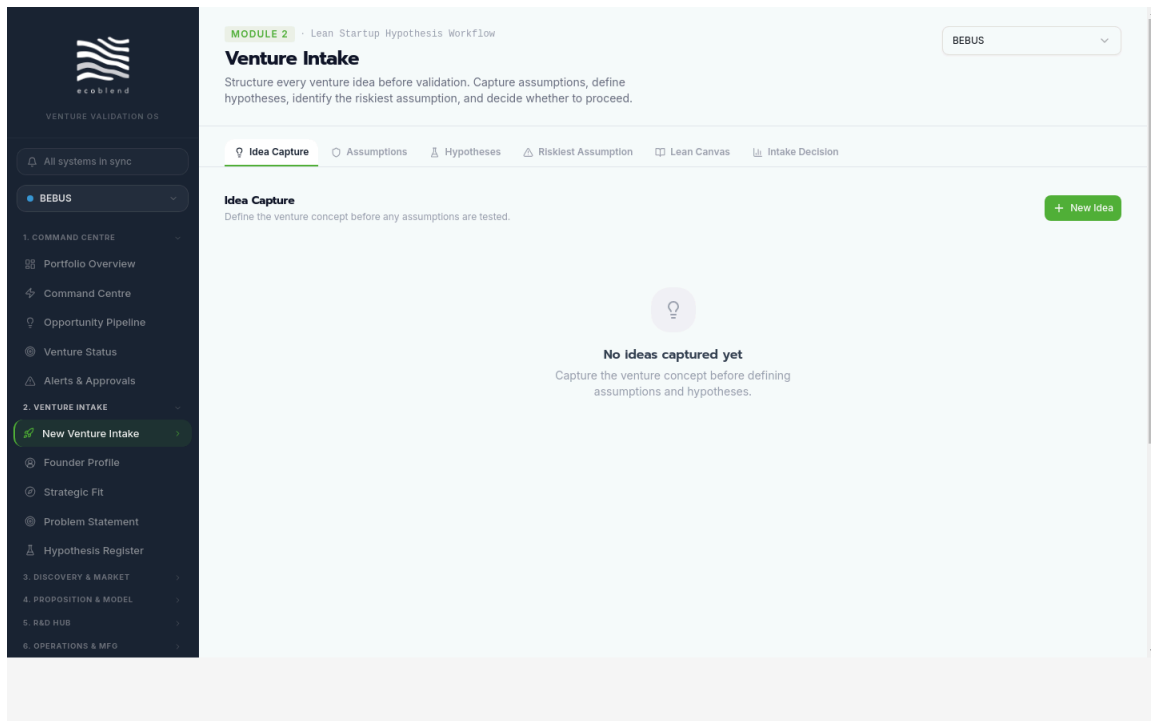

Figure 3: 3. Venture Intake — EcoBlend OS VBS, ecoblend.io

Module Description

The six-tab Lean Startup hypothesis-capture workflow. Tabs: (1) Idea Capture — origin source, sector, target customer, problem area, proposed solution, why now, moat fields with completeness score; (2) Founder Assumptions — importance × uncertainty risk matrix (1–25), risk classification (low/medium/high/critical), evidence tracking, convert-to-hypothesis action; (3) Hypothesis Register — 12 hypothesis types, status tracking, test method, success metric; (4) Riskiest Assumption Test — priority score formula (Risk 50% + Impact 30% + Evidence Gap 20%), lean experiment creation; (5) Lean Canvas — 11-block canvas with versioning and completeness score; (6) Intake Decision — 0–100 Intake Readiness Score from 6 sub-scores, recommendation engine with 8 decision types, approve/reject workflow.

4. VRL Analytics

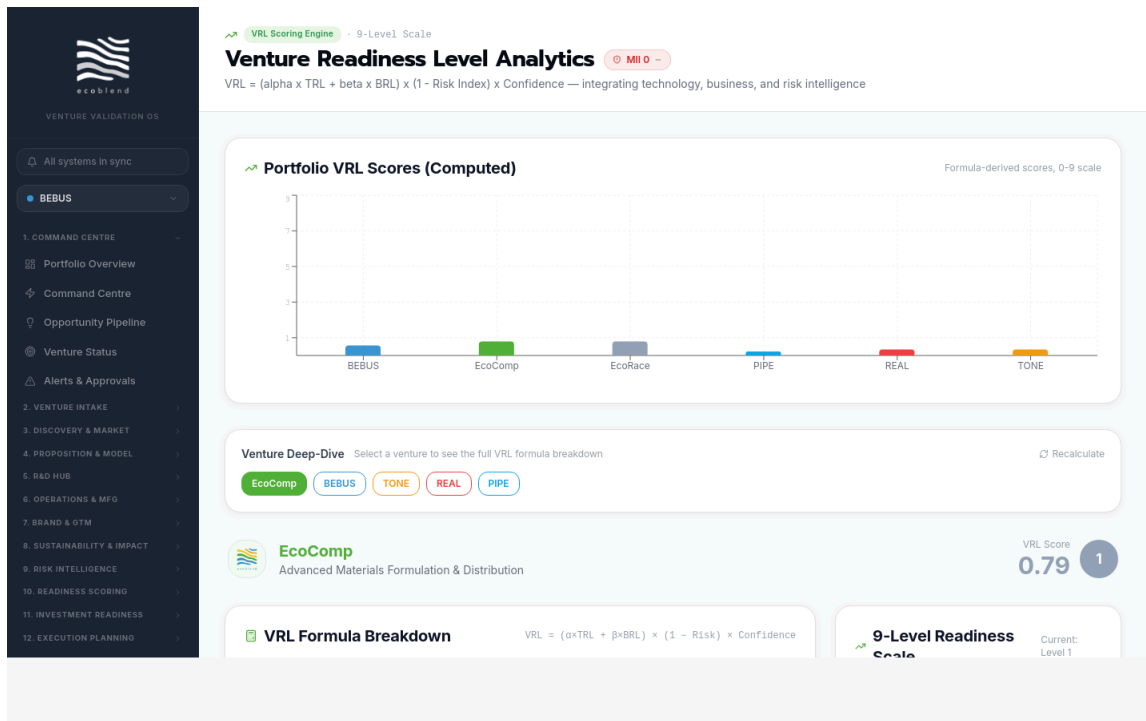

Figure 4: 4. VRL Analytics — EcoBlend OS VBS, ecoblend.io

Module Description

Venture Readiness Level analytics dashboard. Displays the 9-dimension radar chart (TRL, MRL, BRL, ECO, PRL, IP, FRL, REG, SRL) for each venture, historical VRL trend lines, band distribution (Pre-Readiness through Exemplary), and dimension-level gap analysis. Supports side-by-side venture comparison and drill-down to individual dimension scores.

5. TRL Analytics

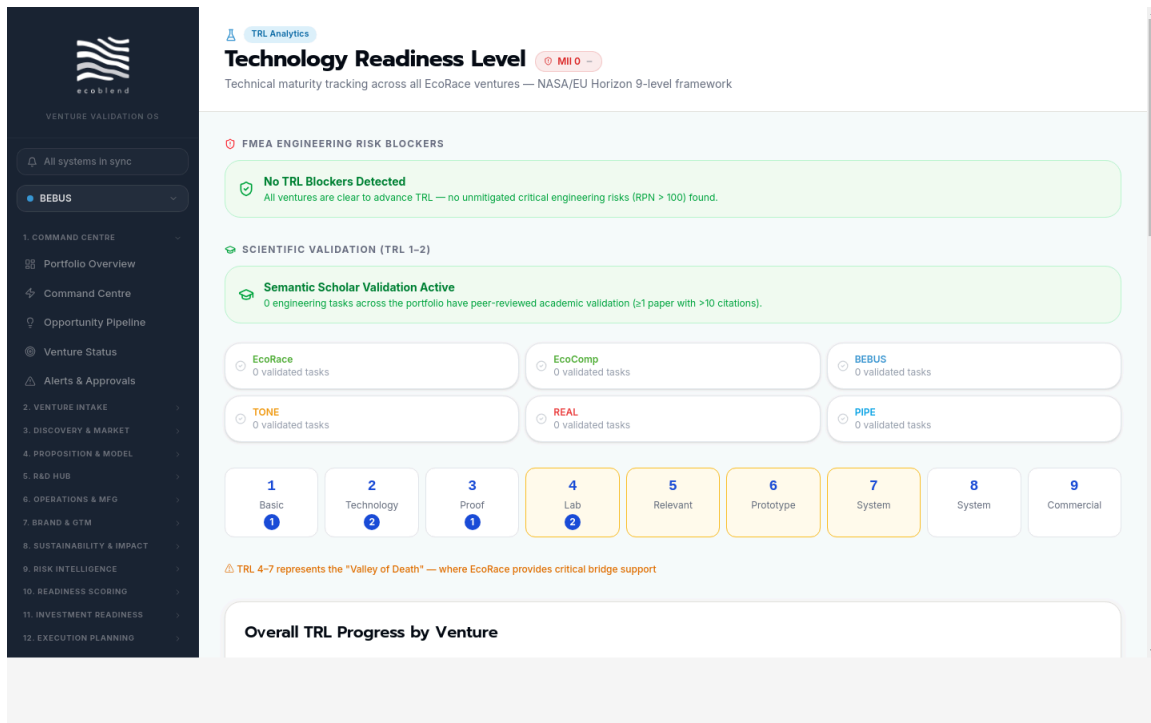

Figure 5: 5. TRL Analytics — EcoBlend OS VBS, ecoblend.io

Module Description

Technology Readiness Level analytics. Tracks TRL progression from level 1 (Basic Principles) through level 9 (System Proven in Operational Environment) for each venture. Displays task completion by TRL level, experiment linkage, and readiness gate status. Includes a TRL velocity chart showing progression rate over time.

6. BRL Analytics

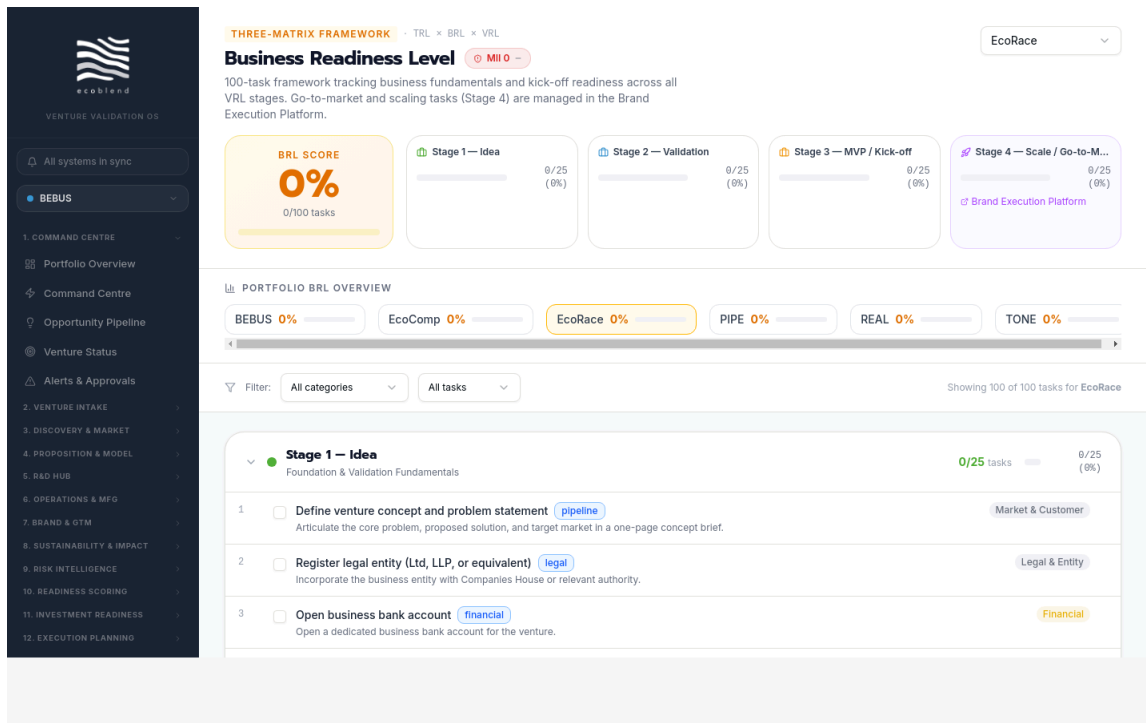

Figure 6: 6. BRL Analytics — EcoBlend OS VBS, ecoblend.io

Module Description

Business Readiness Level analytics. Tracks business model validation, revenue model clarity, channel readiness, and operational scalability across all ventures. Displays BRL scores per venture with trend history, task completion rates, and a portfolio-wide BRL distribution chart.

7. VRL Scoring Engine

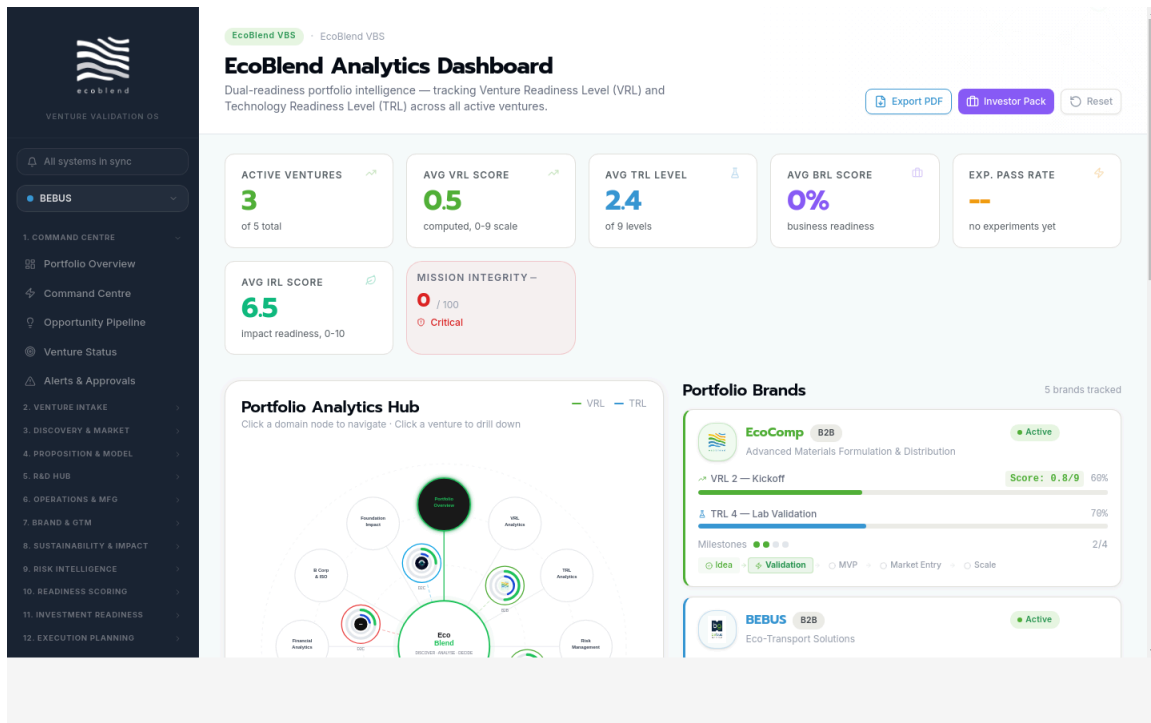

Figure 7: 7. VRL Scoring Engine — EcoBlend OS VBS, ecoblend.io

Module Description

The interactive VRL scoring interface. Allows manual input of all 9 dimension scores (0–100) for any venture. Displays the computed composite VRL score using the proprietary formula: $\text{Product} = (\text{TRL} + \text{IP}) / 2$; $\text{Market} = (\text{MRL} + \text{ECO}) / 2$; $\text{Execution} = (\text{BRL} + \text{PRL}) / 2$; $\text{Structural} = (\text{FRL} + \text{REG}) / 2$; $\text{VRL} = \text{average of 5 meta-domains}$. Veto gate logic: any dimension below 20 caps VRL at 40. Shows band classification and veto gate status.

8. WTP Assessment

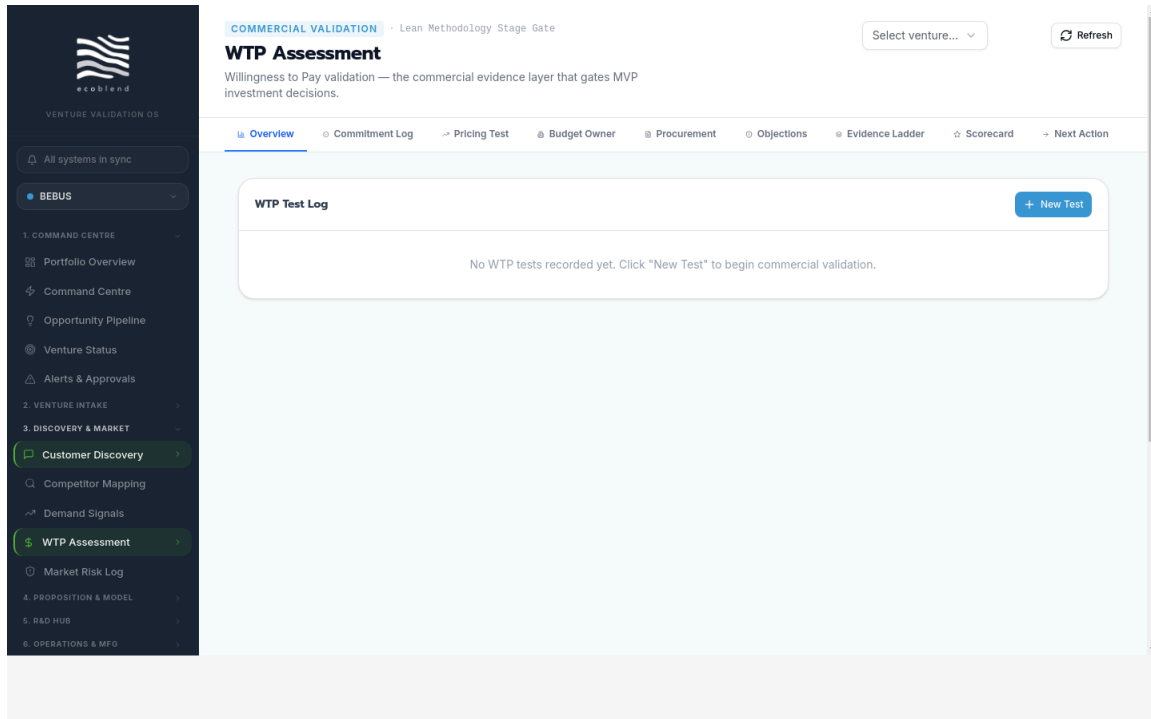

Figure 8: 8. WTP Assessment — EcoBlend OS VBS, ecoblend.io

Module Description

Willingness To Pay Assessment module with nine tabs: Overview (composite WTP score, evidence level, recommendation), Commitment Log (signed LOIs, verbal commitments, pilot agreements), Pricing Test (pricing experiment records with response tracking), Budget Owner (budget authority validation), Procurement (pathway mapping and friction scoring), Objections (objection log with resolution tracking), Evidence Ladder (7-rung evidence progression: Anecdotal → Verbal Interest → Exploratory Meeting → Pilot Agreement → Signed LOI → Paid Pilot → Repeat Purchase), Scorecard (composite WTP score breakdown), and Next Action (recommended experiment or decision).

9. Market Intelligence

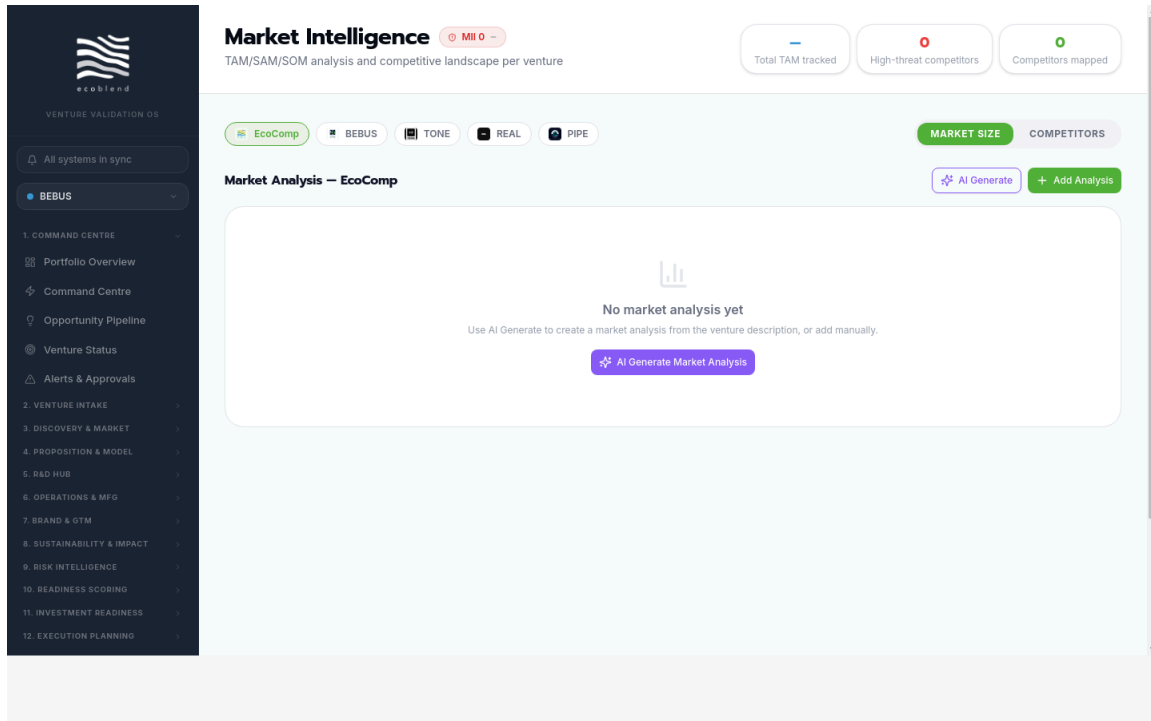

Figure 9: 9. Market Intelligence — EcoBlend OS VBS, ecoblend.io

Module Description

Market research and competitive intelligence hub. Contains market reports with TAM/SAM/SOM data, competitor profiles with feature comparison matrices, market risk log linked to the `venture_risks` table, and market opportunity tracking. Supports evidence-based market sizing with source citation and confidence scoring.

10. Risk Management

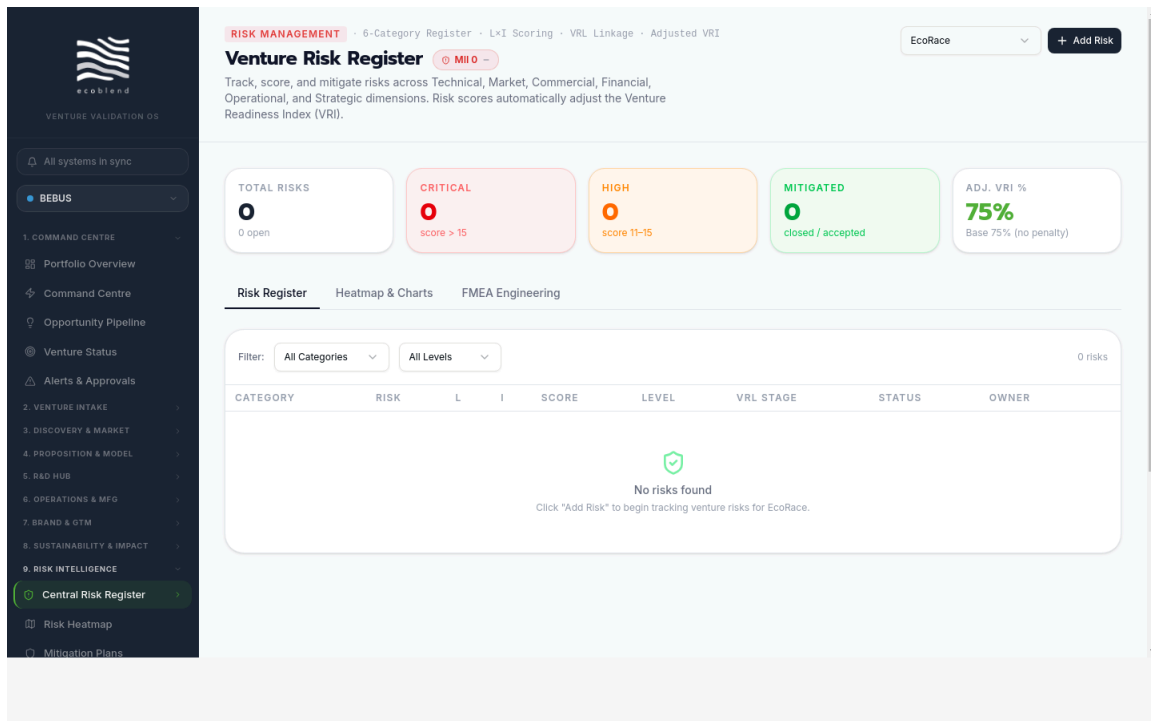

Figure 10: 10. Risk Management — EcoBlend OS VBS, ecoblend.io

Module Description

Dual-layer risk management module. Layer 1: Venture Risk Log — categorised risks (market, technical, operational, financial, regulatory, team) with severity (1–5), likelihood (1–5), and FMEA RPN score (Severity × Occurrence × Detectability). Layer 2: Startup Failure Early Warning System — 9-dimension weighted risk score (Cash Runway 20%, Customer Validation 15%, Revenue Model 15%, Team Competency 15%, Execution Velocity 10%, Flexibility 10%, Funding Progression 5%, Market Timing 5%, Strategic Roadmap 5%) with Green/Amber/Red band classification.

11. Investment Readiness

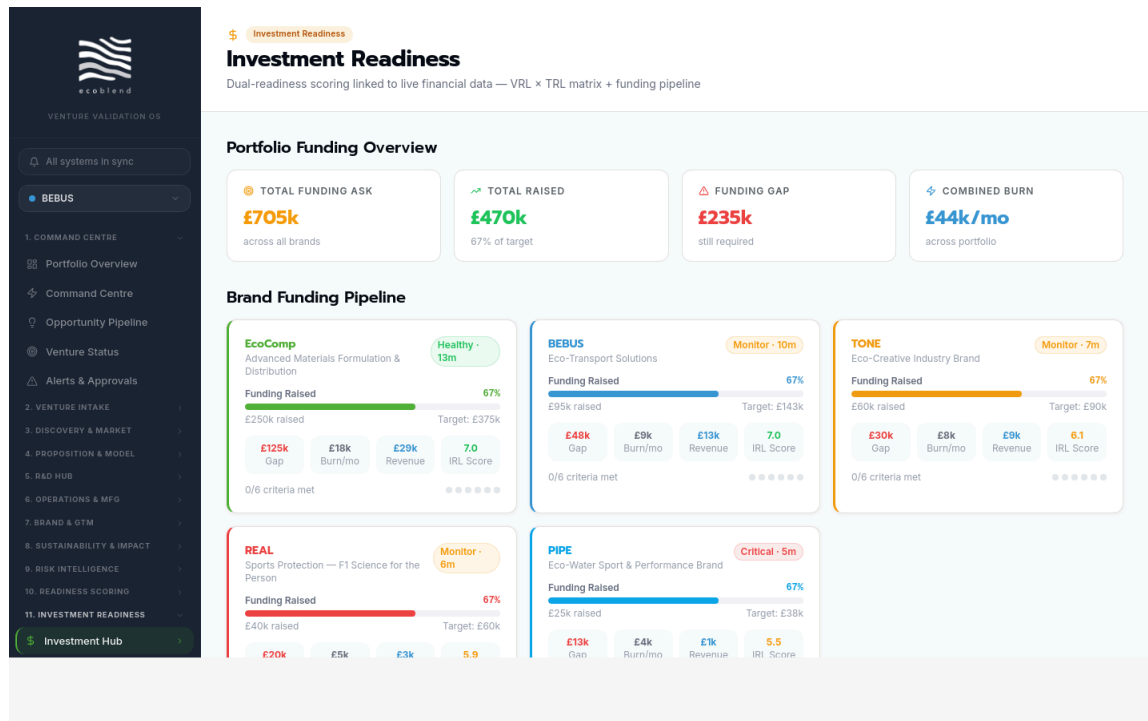

Figure 11: 11. Investment Readiness — EcoBlend OS VBS, ecoblend.io

Module Description

Investment readiness tracking and fundraising pipeline. Displays investment readiness score, funding gap analysis, burn rate and runway metrics, investor contact management, and round tracking (Pre-Seed through Series B+). Includes a fundraising timeline view and investor engagement log.

12. Financial Analytics

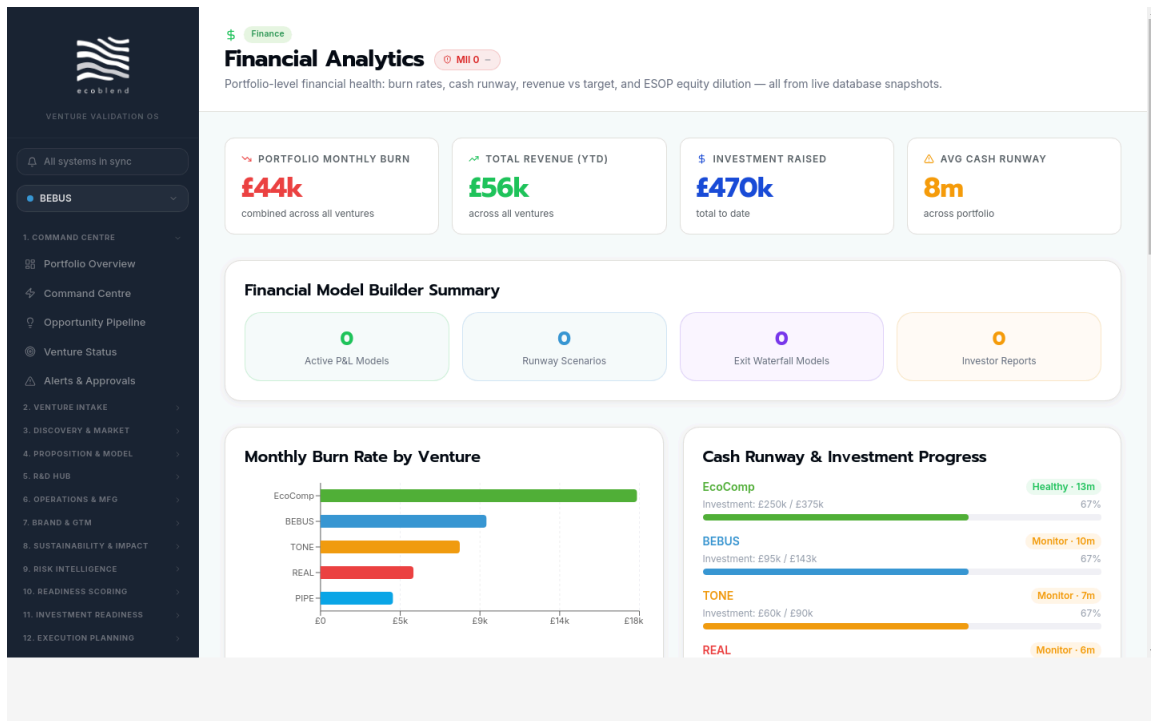

Figure 12: 12. Financial Analytics — EcoBlend OS VBS, ecoblend.io

Module Description

Financial performance analytics. Tracks revenue targets vs actuals, engine of growth metrics (Sticky/Viral/Paid), burn rate, unit economics (CAC, LTV, LTV:CAC ratio), and financial snapshot history. Displays a financial health scorecard and monthly trend charts for key financial KPIs.

13. People Intelligence

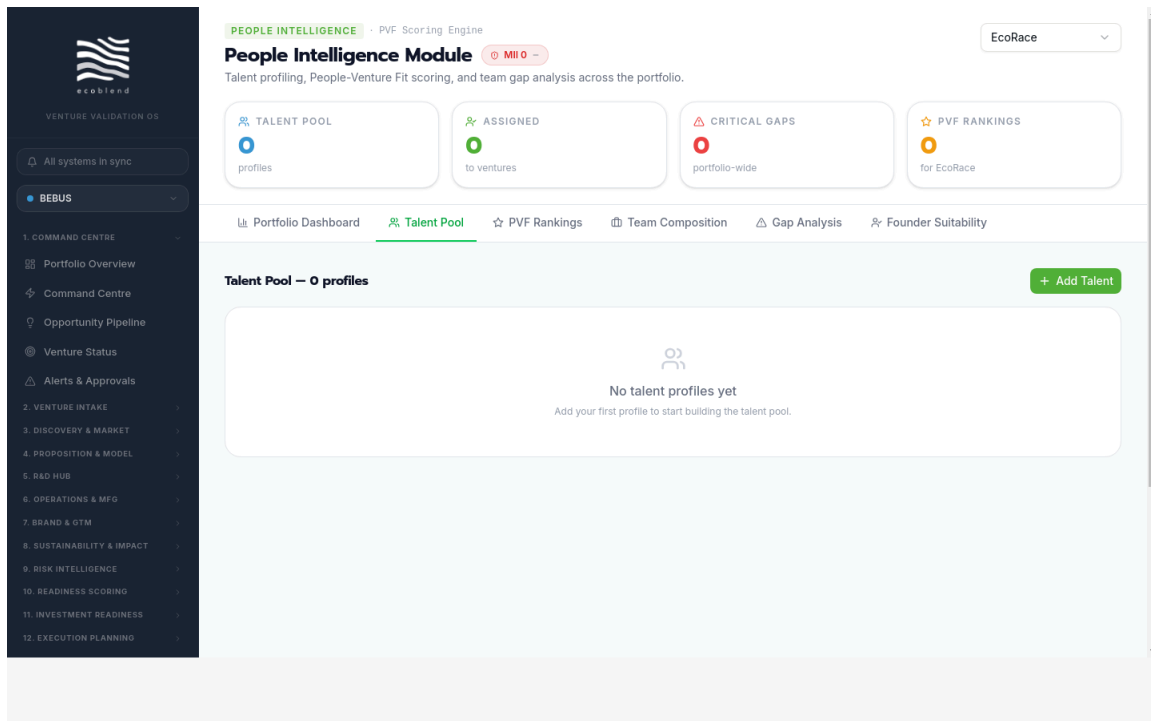

Figure 13: 13. People Intelligence — EcoBlend OS VBS, ecoblend.io

Module Description

People-Venture Fit (PVF) intelligence module with five tabs: Portfolio Dashboard (5 KPI tiles: Total Talent, Available Now, Open Roles, Critical Gaps, Avg PVF Score; top talent rankings; critical gaps panel; open roles matrix), Talent Pool (talent profiles with skills, stage experience, availability), PVF Rankings (ranked talent by composite PVF score using formula: Skills Match 30% + Industry Match 20% + Stage Match 20% + Network Value 15% + Availability Fit 15%), Team Composition (recommended team structures per venture), and Gap Analysis (missing capabilities heatmap with severity: Critical ≥ 40 , High ≥ 25 , Medium ≥ 10 , Low < 10).

14. Experiment Log

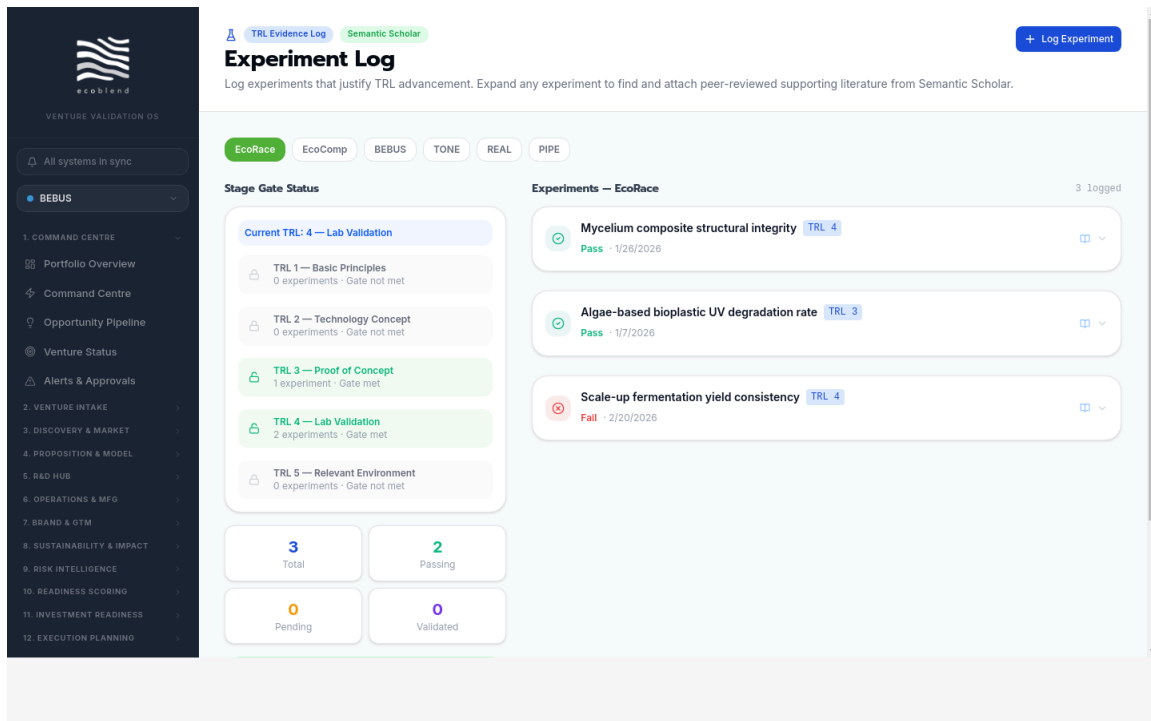

Figure 14: 14. Experiment Log — EcoBlend OS VBS, ecoblend.io

Module Description

Lean experiment tracking across all ventures. Records experiment hypothesis, method, success metric, results, and learnings. Links experiments to specific hypotheses in the Hypothesis Register and to WTP tests. Displays experiment velocity (experiments per week), success rate, and a learning log sorted by impact.

15. Customer Interviews

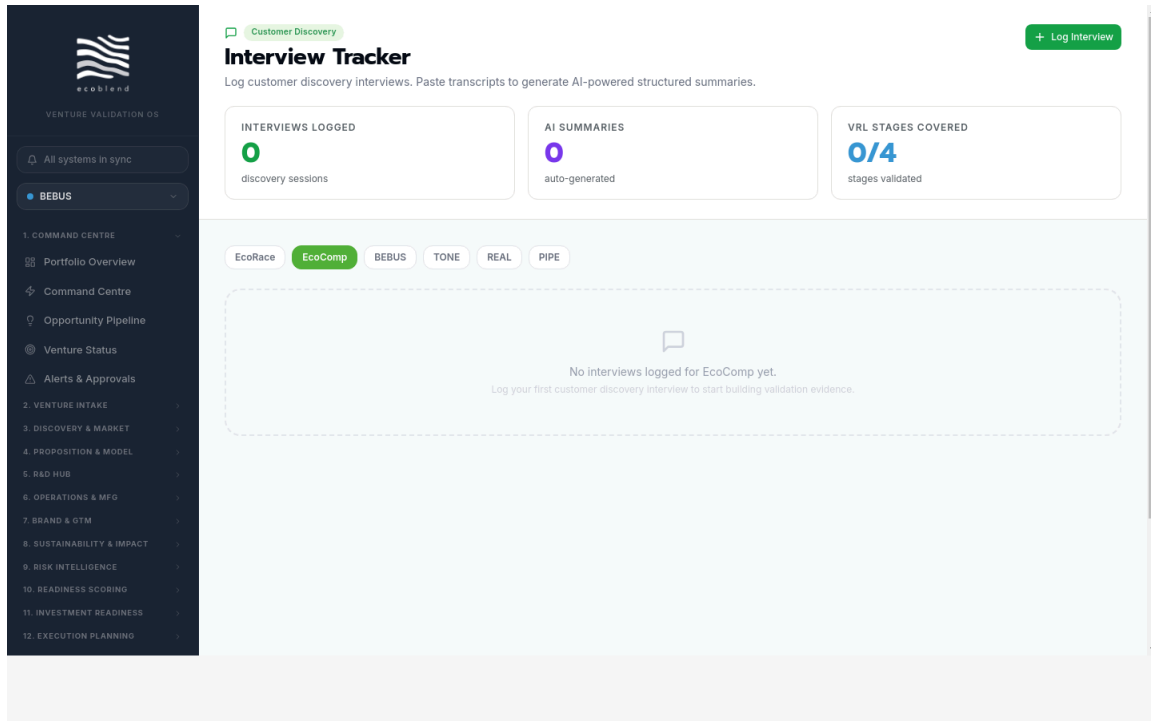

Figure 15: 15. Customer Interviews — EcoBlend OS VBS, ecoblend.io

Module Description

Customer discovery interview management. Records interview subjects, date, venture, key insights, pain points identified, and Jobs-To-Be-Done (JTBD) findings. Supports tagging by customer segment and linking insights to specific hypotheses. Displays interview coverage by segment and insight frequency analysis.

16. Academic Research

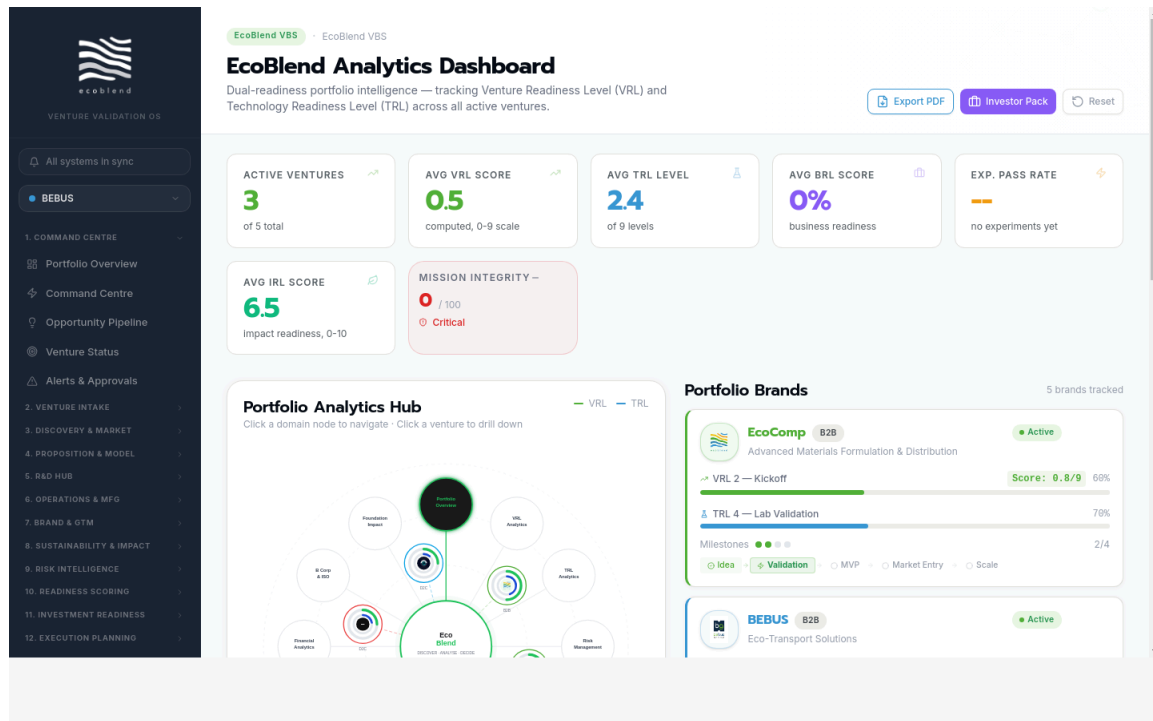

Figure 16: 16. Academic Research — EcoBlend OS VBS, ecoblend.io

Module Description

Academic evidence management for venture validation. Tracks research papers, researchers, university partnerships, and evidence claims linked to venture hypotheses. Supports citation management, evidence quality scoring, and research gap identification. Designed to support evidence-based decision making and B Corp / academic credibility.

17. Brand Readiness

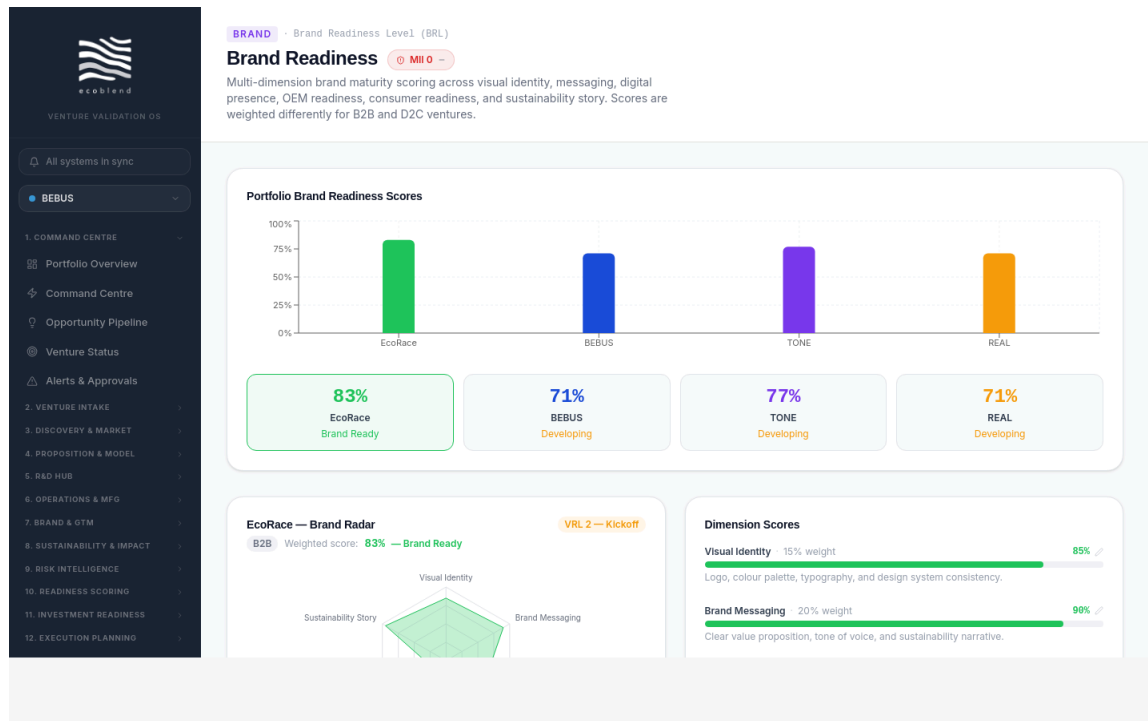

Figure 17: 17. Brand Readiness — EcoBlend OS VBS, ecoblend.io

Module Description

Brand and PR readiness tracking. Manages brand assets, press releases, media coverage log, newsletter campaigns, and brand readiness score. Tracks brand consistency across ventures, media mention volume, and PR pipeline. Includes a brand scorecard with dimensions: Visual Identity, Messaging Clarity, Digital Presence, Media Coverage, Community Engagement.

18. Legal Contracts

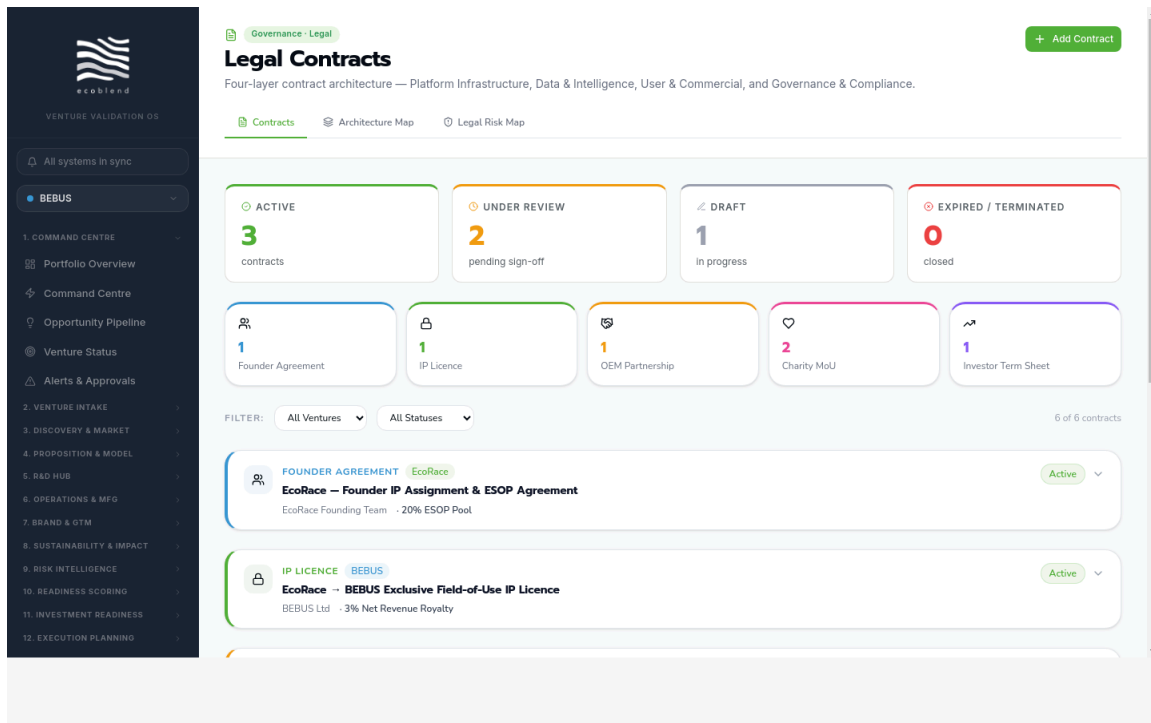

Figure 18: 18. Legal Contracts — EcoBlend OS VBS, ecoblend.io

Module Description

Contract management module. Tracks all venture contracts with counterparty, contract type (NDA, LOI, SaaS Agreement, Partnership, Employment, IP Assignment), status (Draft, Under Review, Signed, Expired), value, and expiry date. Supports document attachment via S3 storage and contract renewal alerts.

19. Opportunity Pipeline

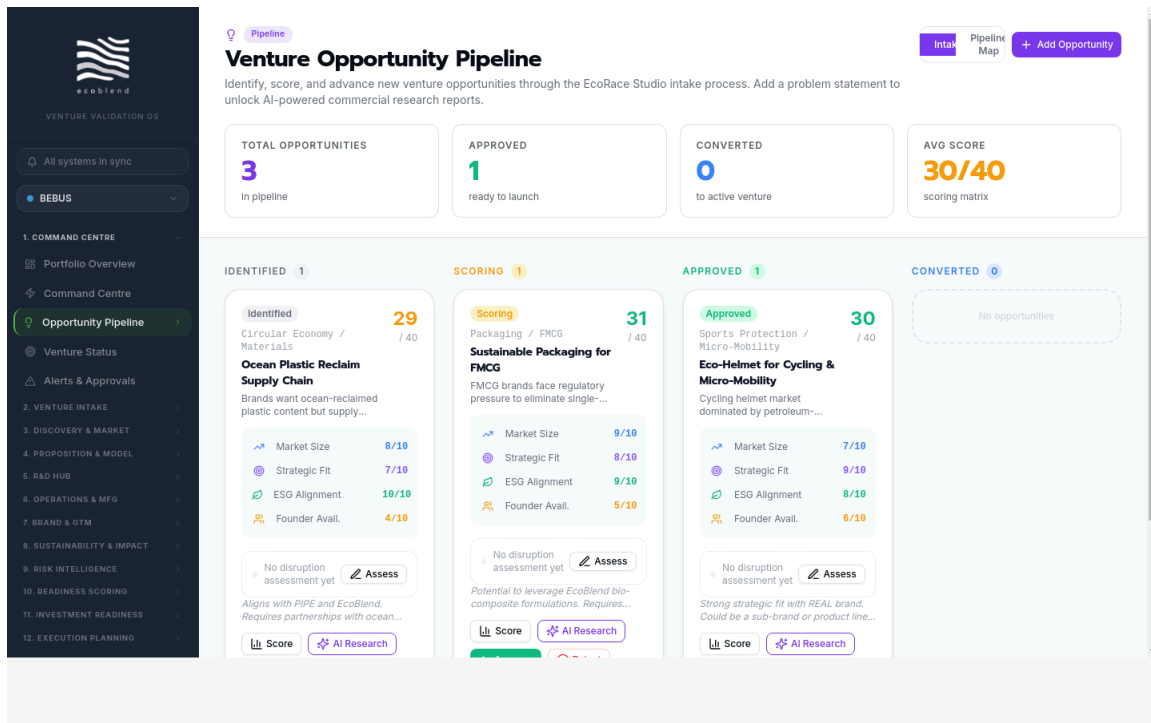

Figure 19: 19. Opportunity Pipeline — EcoBlend OS VBS, ecoblend.io

Module Description

Commercial opportunity pipeline management. Tracks opportunities across ventures with stage (Identified, Qualified, Proposal, Negotiation, Closed Won, Closed Lost), estimated value, probability, and next action. Displays pipeline value by stage, win rate by venture, and a weighted pipeline forecast.

20. Founder Profiles

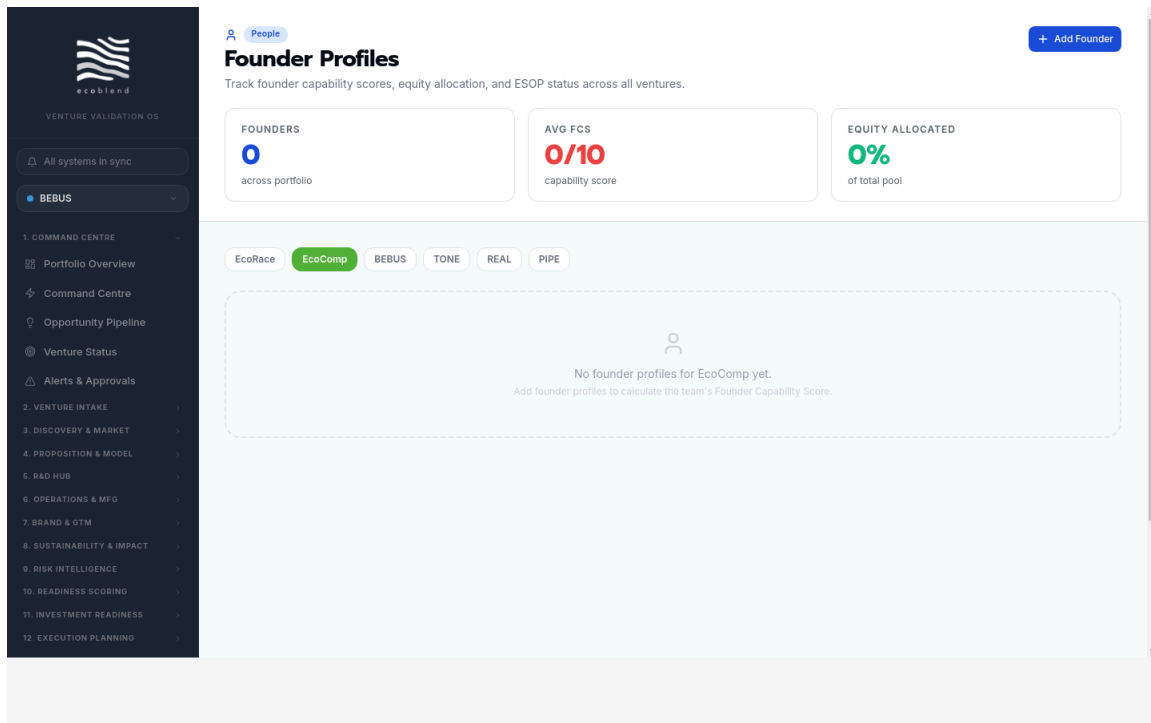

Figure 20: 20. Founder Profiles — EcoBlend OS VBS, ecoblend.io

Module Description

Founder and co-founder profile management. Records founder background, functional expertise, stage experience, network strength, and behavioural attributes. Includes a Founder Suitability Scorecard assessing leadership, domain expertise, execution capability, resilience, and network leverage. Supports the Co-Founder Matrix for team composition analysis.

21. B Corp & ISO Tracker

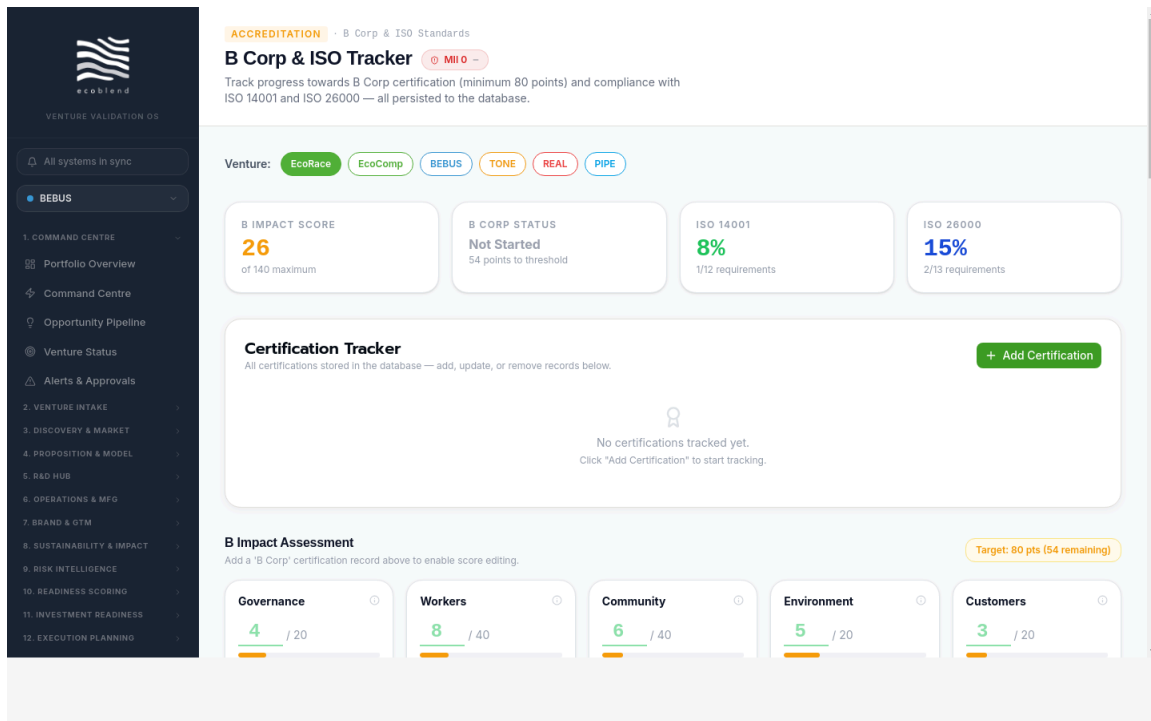

Figure 21: 21. B Corp & ISO Tracker — EcoBlend OS VBS, ecoblend.io

Module Description

B Corp certification and ISO standards compliance tracker. Monitors progress across B Corp impact areas (Governance, Workers, Community, Environment, Customers) with evidence tracking and score estimation. Tracks ISO standard compliance (ISO 9001, ISO 14001, ISO 27001) with gap analysis and audit readiness scoring.

22. EcoBlend Playbook

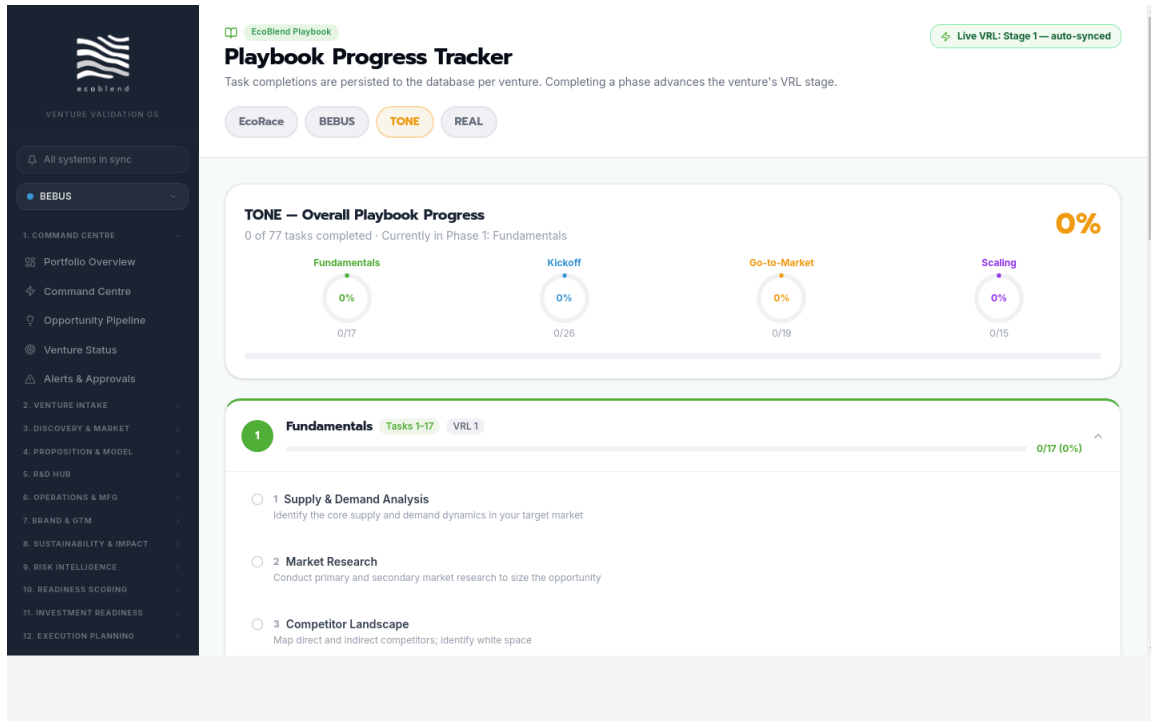

Figure 22: 22. EcoBlend Playbook — EcoBlend OS VBS, ecoblend.io

Module Description

The EcoBlend OS operational playbook. Contains structured playbook entries for each venture stage, standard operating procedures, KPI definitions, and asset library. Supports playbook run tracking (which procedures have been executed per venture), KPI benchmarking, and asset management. Serves as the institutional knowledge base for the H4 Lean Methodology.
